PROFESSIONAL EXPERIENCE

Coder Foundry, Web Software Engineer

Kernersville, NC · March 2017–July 2017

- Created a personal portfolio and blog website using C#, MVC5 and JavaScript.
- Created a fully functional MVC bug tracker web application, from scratch, implementing enhanced security and file uploading features.
- Created a fully functional financial portal web application using .NET MVC framework. Composed dynamic front-end design using partial views and AJAX.
- Created a fully functioning mobile vehicle information application using Xamarin. Accessed NHTSA's car recalls database using WebAPI2. Included images using Bing's Cognitive Image Search API. Built RESTful APIs and utilized Azure App Services.

Cru, Software Developer

Orlando, FL · 2013–2017

- Leveraged Microsoft MVC using Visual Studio's IDE while implementing code using HTML, CSS3, JavaScript, C#, .NET, plus the Outsystems PaaS in order to perform both team and individual development of complex web-based Software for headquarters & multi-language international use, as well as designing middleware and project management workflow applications.
- Leveraged prior vast Systems Administration work to help setup internal test and development servers and production servers' configuration in the cloud with Amazon Web Services (AWS) along with necessary CSR and SSL certificates, domain purchases, and secure plus private positioning over the WAN and Site-to-Site VPN.

Cru, Computer Database Specialist

San Clemente, CA / Orlando, FL · 1999–2013

- Server management (print, file, database, deployment, client-management) while also administrating complex user access needs including SSO of Relay, PeopleSoft, Goldmine, Novell, Microsoft Active Directory and Exchange, and ultimately Google cloud services.
- Provided team leadership while coordinating customer service in Help Desk phone and remote response, local-computer installation and troubleshooting, extensive office-wide software training, and its license administration.
